## Announcing the Trimble Tempest Antenna

Trimble introduces the new Trimble<sup>®</sup> Tempest<sup>™</sup> antenna, which replaces the Trimble Hurricane antenna in the Trimble Mapping & GIS product family.

The Trimble Tempest antenna delivers improved GPS performance including yield—the ability to obtain positions under difficult GPS conditions. Its key features are:

- GPS L1
- SBAS capable (WAAS/EGNOS/MSAS)
- Integrated magnets on the bottom of the antenna, allowing it to be directly mounted on the roof of a vehicle
- TNC antenna cable connector

The new Tempest antenna is the recommended external antenna option for:

- The GeoXT<sup>™</sup> handheld
- The GPS Pathfinder<sup>®</sup> ProXT<sup>™</sup> receiver

### Ordering information and availability

When ordering the new Tempest antenna as an optional accessory, use the following part number:

Product	Part number
Trimble Tempest antenna	57973-00

The Trimble Tempest antenna ships as a standalone part.

You must also order the appropriate antenna cable for use with the Tempest antenna; the antenna is not shipped with a cable, instead you can choose the required cable type and length:

Model	Antenna cable part number	Connector
GeoXT handheld	70800-15 (1.5 m) / 70643-07 (5 m)	TNC / SMB
GPS Pathfinder ProXT receiver	70800-15 (1.5 m) / 70643-07 (5 m)	TNC / SMB

## Software compatibility

The Trimble Tempest antenna requires an updated antenna.ini file. This file and update instructions can be downloaded from the [TerraSync software downloads](#) section, the [GPScorrect™ Extension downloads](#) section, and the [GPS Pathfinder Office downloads](#) section on <http://www.trimble.com>.
